

# Solar Eclipse Party

What lasts a maximum of 2 minutes and 43 seconds? No, not your lunch break—totality of this Monday’s solar eclipse (in Giant City Park, Ill.)! We’ll only see 92 percent totality in Denver, but our viewing party’s going to be 100 percent awesomeness!

Join us for some tunes (like “Here comes the sun” ) and snacks (like Sun Chips, Capri Sun juice, and even Blue Moon beer.) Then, grab your free eclipse viewing glasses (while supplies last) and enjoy the show! Don’t miss it. It’s going to be **stellar**!

## Event Details:

**Date:** Monday, Aug. 21

**Time:** 10 a.m. – 1:30 p.m.

**Where:** Commons/Courtyard

## Optimal Eclipse Viewing Time:

Begins: 10:23 a.m.

**Maximum: 11:47 a.m.**

Ends: 1:14 p.m.

## *Did you know?*

*The last total solar eclipse in the continental U.S. was in 1979. The next one will be in 2024!*
